Cornell Design and Tech Initiative

Ithaca, NY

FULL STACK DEVELOPER

Sept. 2019 - PRESENT

- Develop the backend of "cue", a mobile app for discovering events at Cornell, using React, Django, and PostgreSQL.
- Implemented a backend interface for importing and processing event data from both a web scraper and user-generated files.

FIRST Robotics Competition, Great Neck South High School

Great Neck, NY

PROGRAMMING LEAD

Sept. 2017 - May 2019

- Programmed various robots in Java for competition and local community outreach events.
- Optimized robot movement through PID control and real-time visual processing.
- Hosted programming workshops for current and prospective team members.
- Contributed to consistent competition performance, leading the team to qualify for the FIRST Championship (Worlds) two seasons in a row.

Programming Club, Great Neck South High School

Great Neck, NY

CO-PRESIDENT

Sept. 2017 - May 2019

- Coordinated school-wide events such as the Hour of Code to introduce students to programming.
- Partnered with the Girls Who Code organization to encourage women to pursue programming.
- Organized student trips to hackathons.

Community Church of Great Neck

Great Neck, NY

VOLUNTEER

Oct 2016 - Aug. 2019

- Coordinated weekly service slideshow presentations with various church subcommittees.
- Managed an in-house server for data synchronization and archival.

Side Projects

Ask Palette - BigRed//Hacks

Sept. 2019

SOLO DEVELOPER

- Developed a web tool that generates a color palette from a given search query using Google App Engine and Flask.
- Integrated Google Cloud ML Engine to analyze queried search terms and produce appropriate colors.
- Designed a cache system to avoid unnecessary API calls.

Half Bot Half Brain - TeenHacksLI

May 2019

DEVELOPER

- Developed a tool to analyze input text and generate a grammatically valid variation of given text using a React frontend and Flask backend.
- Created an interface where user can enter custom text and view the generated result.

Legends of Code and Magic - Competition

July 2018 - Sept. 2018

CONTESTANT

- Designed an AI in Java to play a digital strategy card game.
- Implemented an efficient game model to use with Monte Carlo tree search.
- Placed 81st out of over 1000 competitors.

QMK Firmware

July 2018

OPEN SOURCE CONTRIBUTOR

- Implemented Bluetooth functionality for the HHKB keyboard model.
